

AI GOVERNANCE REPORT

Model: Logistic Regression

Accuracy: 0.794

DIR: 1.052

Risk Score: 2.53

Final Decision:

SAFE TO DEPLOY

This report evaluates whether the AI model is safe and fair for deployment. The system measures bias using Disparate Impact Ratio (DIR). If the model shows unfair behavior across groups, mitigation techniques are applied. Based on fairness and accuracy, a final deployment decision is made.
